KitchenAid® Multifunction Over-the-Range Oven with Flush Built-In Design

This KitchenAid® Multifunction Over-the-Range Oven combines the versatility of an air fryer, toaster oven, convection oven, microwave and ventilation hood, all in one space-saving appliance designed for flush installation within a standard 12 ¾" cutout.

Features:

- **Air Fry Mode:** Replaces a countertop air fryer for all of the crisping with none of the clutter. Triple heating elements and a fan circulate hot air around the included air fry basket to crisp and brown food with less oil.*
- **Multifunction Oven Modes:** Replace a convection or toaster oven, freeing up counter space by elevating your baking, roasting, broiling and toasting. Triple heating elements and a fan direct heat where it's needed to cook at temperatures up to 450°F.
- **Flush Built-In Design:** Provides a seamless built-in look within a standard 12 ¾" deep cutout. When closed, the microwave door fits evenly with surrounding cabinet fronts, so your kitchen stands out, not the appliance.
- **Turntable-Free Design:** Maximizes cooking space for large dishes or multiple items at the same time. A hidden motor circulates microwave heating throughout the entire oven, eliminating the need for a traditional turntable.
- **Smart Appliance:** Gives you control over every stage of cooking. Remotely preheat, monitor and control the microwave oven with the KitchenAid™ App or with simple voice commands through your Google Assistant or an Alexa-enabled device, leaving your hands free to create.*
- **Backlit Touch Controls:** Illuminate when in use and fade unobtrusively into the sleek black glass of the oven door when the oven is off. A full-color LCD display makes it easy to see and select cooking modes, temperatures and cook times.
- **Microwave Cooking Modes:** Provide convenient presets for popular cooking tasks, including cook, reheat, soften, melt and defrost. The microwave will automatically adjust cook time and power levels for different foods and beverages, taking the guesswork out of choosing settings.
- **Three-Speed 400 CFM Motor Class* Ventilation System** *Performance varies based on installation. Resources available at AHAM.org: Features low, medium and high settings to help clear the air of smoke and steam, keeping up with all kinds of cooking adventures, from gentle simmering to high-heat searing.
- **Keep Warm Mode:** Maintains low heat for up to 60 minutes to keep cooked foods at serving temperature, allowing you to focus on other steps in your creative process or finish one dish while another rests.
- **Steam Clean Mode:** Uses the power of steam to help loosen cooked-on food without the need for harsh cleaners. After running this cycle, just wipe down the inside of the microwave with a damp cloth.
- **PrintShield™ Finish:** Resists smudges and fingerprints. The specialized coating for stainless steel is easy to clean with just water and a soft cloth, so you can spend more time cooking and less time cleaning up the kitchen.
- **Two LED Lights with Night Light Setting:** Provide two levels of brightness, allowing you to illuminate the entire cooking surface below with natural-looking light or subtly accent the kitchen with a soft, inviting glow.
- **Stainless Steel Covered Grease Filters:** Conceal aluminum mesh filters behind a sleek stainless steel panel for a fully finished look. Filters use multiple layers of screening to help capture the grease and odors of high-heat cooking and remove for easy cleaning with soap and water.
- **1.1 Cu. Ft. Capacity:** Comfortably fits a variety of dishes with enough height for a mixing bowl and width for a 9" x 13" casserole dish or multiple items at the same time.
- **950-Watt Microwave Cooking Power:** Cooks quickly to boil water, defrost ingredients or warm completed dishes to enjoy again.
- **What's in the box:** Model KMMF530P includes a Dishwasher-Safe Air Fry Basket, a Toasting Pan, and an Oven Rack
- **Bake Mode:** Uses dual heating elements to bake at temperatures up to 450°F, eliminating the need for a countertop convection or toaster oven. The included oven rack fits a 9" x 13" pan.
- **Air Bake Mode:** Uses triple heating elements and a fan for convection baking at temperatures up to 450°F, eliminating the need for a countertop
