36" Retractable Downdraft Ventilation System

This 36-inch retractable downdraft ventilation system rises 13.5 inches to help filter steam from tall stockpots, and remains flush with the cooking surface when not in use. The 585 CFM Motor Class* ventilation system has the power to provide effective venting for most cooktops or ranges. The system is reversible to help fit in the cabinet space under the vent.

*Performance varies based on installation. Resources available at AHAM.org

Features:

- Retractable Downdraft Design: Provides a sleek, integrated ventilation solution by remaining flush with the countertop until needed, then rising high above the cooktop surface when turned on.
- 585 CFM Motor Class Ventilation System: Helps capture smoke, grease and odors from the cooking surface below for everything from simmering to high temperature cooking techniques like pan searing and stir-frying so you can experiment with confidence.
- 65,000 BTU Rating: Allows for installation above most 36 or 30-inch cooktops, including some commercial-style cooking surfaces.
- 4-Speed Slide Control: Makes it easy to select and adjust fan speed depending on your ventilation requirements.
- 13.5" Rise: Enhances overall capture above the cooktop
- Mesh Filters: Help keep the kitchen environment fresh and also provide proper filtration of grease and odors to help reduce contact with ceilings and countertops.
- Reversible Motor Box: Lets you create versatile installation options by allowing the motor box to be installed on either side of the downdraft to free up the space beneath the cooking surface.
- 36" Retractable Downdraft System: This 36-inch retractable downdraft vent rises 13.5 inches to help filter steam from tall stockpots, and remains flush with the cooking surface when not in use. The 585 CFM Motor Class ventilation system has the power to provide effective venting for most cooktops. The vent system is reversible to help fit in the cabinet space under the vent.
