Model #: WCIT6030SB

30" Induction Cooktop with WipeClean™ Coating - 4 Elements

Take on mealtime with an induction cooktop that cooks fast using induction technology. Featuring WipeClean™ Coating, the easiest-to-clean induction cooktop coating.*

*When compared to cooktops with same heating technology and similar wattages.

Features:

- WipeClean™ Coating: Skip scraping & intense scrubbing of baked-on foods with WipeClean™ Coating, the easiest-to-clean induction cooktop coating.* Clean your everyday spills with just water, not harsh cleaners. Simply wet with water, wait and wipe away. *When compared to cooktops with same heating technology and similar wattages.
- Induction Cooktop: Induction Technology makes cooking and cleaning fast by transferring heat to the pot, not the cooking surface. This makes cooking and cleaning spills simple.
- Fast Boil: Boil 12 cups of water on average 25% faster* on Booster to help you get dinner to the table in less time.
- Assisted Boil: Assisted Boil notifies you with a helpful tone and flashing light when boiling water reaches the right temperature to add food—so you can keep dinner prep moving and get dinner to the table fast. Requires an accessory pot, part number W11463464, sold separately.*
- Assisted Pan Frying: Assisted Pan Frying notifies you with a helpful tone and flashing light when oil reaches the right temperature to add food—so you can keep dinner prep moving and get dinner to the table fast. Requires an accessory pan, part number W11463466, sold separately.*
- Keep Warm: Low heat keeps food ready to serve when other dishes aren't quite done, saving you time spent heating up food that's gotten cold.
- Compatible Cutout: Install your new induction cooktop into the same size cutout as our electric cooktops, making the switch nearly effortless.
- Control Lock Mode: Control Lock Mode disables the control panel to avoid unintended use and makes cleanup easy.
- Melt: Prevent burning delicate foods like chocolate or butter with a Melt setting that lets you focus on other tasks.
- Simmer: Maintain the right temperature for simmering soups and stews so you can let dishes cook while taking on the next step in meal prep.
- Optional Flush Installation: Choose Optional Flush Installation for a flush fit and seamless look.* With flush installation the cooktop is placed into the countertop, rather than on top of the countertop for a more built-in appearance.
- Pan Detection: Easily see which element is activated with Pan Detection. A flashing symbol alerts you when a pan is removed or replaced on an active element.
- 30 Amp Installation: Properly install with a 30 amp hookup.
- Kitchen Timer: Keep track of cook times with an easy-to-clean Kitchen Timer that's integrated into the controls.
- Wall Oven Compatible: Install this cooktop on a countertop above a Whirlpool® Wall Oven or on its own for more flexibility.
- ADA Compliant: This cooktop meets the Standards for Accessible Design specified by the Americans with Disabilities Act to provide equal access to all.
