Model #: WDT730HAMZ

Quiet Dishwasher with 3rd Rack

Clean dishes with a 51 dBA quiet dishwasher. A 3rd Rack lets you load hard-to-fit utensils to free up more space while the Fingerprint Resistant finish resists smudges and is easy to clean. This dishwasher also includes an Adjustable 2nd Rack to accommodate taller items and a Triple Filtration Wash System that filters food particles and cleans water between wash stages.

Features:

- 3rd Rack: Take advantage of 35% more rack space with a 3rd Rack that makes it easy to load additional silverware and hard-to-fit utensils.
- Adjustable 2nd rack: Make room for taller items like water bottles with easy-to-find adjusters that smoothly raise or lower the 2nd rack.
- 51 dBA: Keep your kitchen quiet during cleanup with a dishwasher sound level of just 51 dBA.
- Fan Drying Technology: Skip hand-drying your dishes with Fan Drying Technology. The drying process uses a fan to deliver our most advanced drying performance in plastic and hybrid tub models.
- Folding Tines: Create the space you need for large dishes or hold down smaller items like lids and measuring cups with Folding Tines.
- Extended Soak Cycle: Presoak and wash in one Extended Soak Cycle to help stuck-on food dissolve away without any extra steps.
- Heavy Cycle: Extra cycle time takes care of heavily soiled messes and hard-to-clean dishes.
- Boost Cycle: Skip scrubbing and pre-rinsing with the Boost Cycle. This cycle uses more water, time and heat than the Normal Cycle and takes less time than the Heavy Cycle so you can target tough messes that need a little extra effort.
- Normal Cycle: Use the Normal Cycle for normal amounts of food soil to clean up leftover messes from your day-to-day meals.
- Quick Wash Cycle: Clean dishes fast with a cycle that thoroughly takes care of plates, pans and glasses when you need them done in a hurry.
- High Temperature Wash Option: High Temperature Wash Option raises the water temperature to help remove stubborn grease and food grime.
- Heated Dry Option: A Heated Dry Option allows you to use a clean, dry dish straight from the dishwasher thanks to added heat for drying.
- Extended Dry Option: Extended Dry Option extends your dry cycle about 30 minutes* to help elevate drying performance for any cycle.
- Sani Rinse Option: Whirlpool® Dishwashers with the Sani Rinse Option are certified by UL to eliminate 99.999% of food soil bacteria and reach a final rinse temperature greater than 150°F to sanitize dishes.
- Sani-Rinse Option: Heats the final rinse water to 155°F, eliminating 99.999% of food soil bacteria.
- Fingerprint Resistant Stainless Steel: Available in a stainless finish, the easy-to-clean exterior resists fingerprints and smudges.
- Cycle Status Indicator: The Cycle Status Indicator light on the outside of the unit glows blue when your dishwasher is running and turns off when the cycle is complete.
- Triple Filtration Wash System: Keep dishes clear of rinsed food particles with a Triple Filtration Wash System that uses a coarse filter to catch large soils, a fine filter to catch medium soils and a micro-fine filter to catch small soils between wash stages.
- Cycle Memory: Cycle Memory quickly starts your dishwasher with one button. It automatically remembers the last cycle you picked so it's stored and ready to go.
- Hybrid Tub with Dark Gray Interior: A Hybrid Tub with Dark Gray Interior helps mask food stains with a stainless steel interior door and dark gray plastic tub.
- Room for 14 Place Settings: Holds up to 14 place settings including 14 dinner plates, salad plates, saucers, bowls, cups, glasses, knives, dinner forks, salad forks, small spoons and large spoons.
- Cycle Interrupt Light Signal: A blinking Cycle Interrupt Light Signal on the front of the unit will tell you when the cycle has been interrupted so you don't forget to restart the cycle.
- Nylon Rack Coating: Nylon coating on the dishwasher racks provides protection that you can trust to ensure long-lasting use.

**Fingerprint Resistant Stainless Steel

Dan's Appliance

- Overfill Detect: A float sensor inside the dishwasher will detect if too much water is in the tub and cut the power to the inlet fill valve to help prevent overfilling.
