- Convection Broil: When cooking thicker cuts of meat like bone-in chicken or steaks over an inch thick, use the Convection Broil setting to brown the top while still keeping the hot air circulating around the food in the oven to cook your food.
- Bake: Cook your favorite treats like cookies, pies, cakes or muffins with the Bake setting that uses hot air to cook food inside the oven.
- Convection Bake: Convection Bake uses the bake and broil heating elements and a fan to achieve more even heating when cooking on multiple racks.*
- Rapid Preheat: The Rapid Preheat option preheats the oven 25% faster and saves time and energy. Using all of the range elements and a fan, the oven heats up more quickly and creates the ideal temperature for single rack baking. Now cutting preheat time for your next batch of chocolate chip cookies or apple crisps is easy.
